

Scorecard

Premium feature

“The Scorecard is key to making sure we stay transparent with all of our stakeholders and do so in a way that’s easy for everyone to understand.”

Rochelle Washington,
 Director of Performance & Accountability
 Chicago Public Schools | Illinois

Measure what matters

People and organizations perform best when they are focused on the things that matter most. Epicenter’s customized Scorecards allow you to prioritize and measure what matters most to your organization.

Stay focused & eliminate surprises

Everyone benefits when expectations are clear and they have a consistent and reliable way to monitor progress, evaluate performance, demonstrate results and inform decisions.

Save time & boost performance

Create a culture of shared responsibility and empowerment by equipping your team with a proven system for measuring what matters and getting things done.

Make informed decisions

Real-time performance information helps you eliminate silos, make better decisions and keep everyone focused on continuous improvement.

Make performance visible & easy to understand

Trust and confidence grow when people do what they say they're going to do. Scorecards make it easier for schools, boards and authorizers to be on the same page and see that what is getting measured is getting done.

Set meaningful standards

Scorecards can be customized to help you measure your mission, and your organization's legal, contractual and performance priorities.

See ratings & trends

Feedback and communication are essential for continuous improvement. Scorecards enable you to be proactive, identify issues and find solutions.

Get started with Scorecard

Our expert support team will ensure your Scorecard launch is successful. We have various models that can be quickly configured to meet your needs or we can help you design your own.

Our most common Scorecards include:

Academic

- Mission specific goals
- College readiness
- Student growth & achievement
- State & federal accountability

Financial

- Fiscal management
- Current financial health
- Long-term financial stability

Organizational & operational

- Governance
- Legal requirements
- Contractual obligations
- Reporting & timeliness
